

PARKING

Students, staff and visitors are all expected to park in the lot west of the building. Parking spaces close to the building are limited and require special permits (issued to students who are permanently or temporarily disabled, senior citizens and the Board of Trustees). For a handicapped permit, a doctor's statement is required. Limited time permits and temporary handicapped permits are available. Applications (requiring driver's license and vehicle registration) and the permits themselves are obtained from the GOCC human resources coordinator. Students should not park in and block the circle drives at each end of the building. These are for bus traffic and emergency vehicles which may need close access to the building.
